Steps to install Android 10 To get Android 10 on our Xiaomi Mi A1, we'll use a Custom ROM, which allows us to take advantage of this version in more than one time. There were many doubts that this model will be extended for at least one more year to receive Android 10, but a lot of attempts by the community have been possible and probabilities that allow you to bring the latest version to our devices, even if you don't make them officially. Application access controls or site access, among other things, are of the most important changes. In our case, we will follow the 'up with the Pixel Experience ROM, as we have a larger number of users. Looking at the files, checking to see if the battery is the phone with the TWRP tool. Within the TWRP tool, we first need to make a full backup of the original software. Then clear the cache and data before updating the Android ROM 10. The next step is to install the Pixel Experience ROM with the install path> Install Zip> by selecting the file with the name PixelExperience.zip To end, restart the device and configure it. News that we can enjoy in the Mi A1 After completing all these steps, we will have access to all the options of Android 10 on the Xiaomi Mi A1 and therefore we will access gestures or dark mode in all applications. In addition, we can count on the assurance that it is developed by two teams that have officially certified it and are very popular in the Android community, we refer to the EXPERIENCE of pixel ROM and the ROM DerpFest. Before we start with the necessary steps, we have to recommend taking all your photos, videos and content, because everything on our phone will be excluded and we will have no chance to recover it. We should also mention that this is a process for which we need to have some knowledge and we should be careful if we do not want to take risks. First, we need to unlock the boot manager of our mobile device and install the TWRP tool that will allow us to install Android 10 later. Today two new recipients with improvements are the Xiaomi Mi A1, which uses pure Android and the Samsung Galaxy J7 launched in 2015. To be notified when it arrives click here.
